Agency Acronym: DPI

Agency Number: 255

Priority: Medium

115.28(12)

Intent:

Require choice and charter schools to participate in the student information system. Beginning in 2013, DPI will be implementing a statewide student information system. Under 115.28, it appears that the state superintendent may only require school districts to participate. The intent is that all choice schools and 2r charters also participate.

This participation is related to a new categorical aid program that is intended for any school that receives public funds.

I think the goal is to allow them to either participate in the SIS or use their own system so long as it is interoperable with the SIS, and that they should be doing one or the other by the end of the 5 year implementation period. Helpful?

Hi Sara,

I don't completely understand the goal here. If the intent is to permit private schools to have their own system, why do we need a law that says so? Can't they establish and use their own system without statutory approval? That is, unless you want to prohibit them from using any system that is not interoperable with the state SIS. Is that the goal?

Hi Peter - in Section 3 of this draft, can we add a provision that states that private schools participating in choice are permitted to be using a student data system that is interoperable with the state SIS after the five year implementation period? It looks to me like we don't need to add the reference to the first 2 sections if the intent is simply to permit private schools to have their own system.

Thanks!

PRIMARY AND SECONDARY EDUCATION

Current law directs DPI to establish a student information system to collect information about pupils enrolled in public schools, including their academic performance and demographic information. Within five years of the system's establishment, every school district must use the system.

This bill includes charter schools in the student information system. The bill also provides that within five years of the system's establishment, every private school participating in a parental choice program must use the system or use another system that is interoperable with the state system.

For further information see the *state and local* fiscal estimate, which will be printed as an appendix to this bill.

The people of the state of Wisconsin, represented in senate and assembly, do enact as follows:
